Choice of Topics

Teachers can choose any **ONE** topic from P.1.

Topic Description

1. Opportunities and Risks of Natural Hazards (自然災害的機會與風險)

Relevance to the DSE curriculum	- C1: Opportunities and Risks
---------------------------------	-------------------------------

- | | |
|------------|--|
| Knowledge: | - to recognize major natural hazards in Hong Kong
- to understand the reasons behind people's different responses to natural hazards |
| Skills: | - to use data collection methods such as questionnaire, interview and scoring
- to draw choropleth maps and scatter diagrams
- to summarize the interviews |
| Values: | - to understand the role of human in complex man-land relationship through the topic of natural hazards |

2. Exploring the Coast in Cheung Chau (長洲海岸探索)

Relevance to the DSE curriculum	- C2: Managing River and Coastal Environments
---------------------------------	---

- | | |
|------------|--|
| Knowledge: | - to identify the characteristics of coast and the coastal landform features
- to examine the factors and processes in shaping the coast |
| Skills: | - to exercise the sampling methods
- to apply various data collection methods e.g. drawing field sketches and using field equipment for measurement
- to draw beach profile for processing and presenting the morphological data |
| Values: | - to appreciate the beauty of the nature
- to recognise the importance of managing marine resources sustainably and maintaining the safety of marine resources |

3. Drifting Classroom (漂流教室)

Relevance to the DSE curriculum	- C2: Managing River and Coastal Environments
---------------------------------	---

- | | |
|------------|---|
| Knowledge: | - to identify the characteristics of river courses and the associated landform features
- to relate the exogenetic fluvial processes with the characteristics of |
|------------|---|

	river channel and the associated landform features
	- to analyze how human factors (river management measures and land use) affect the characteristics of river channel
▪ Skills:	- to use different equipment to collect data of channel characteristics
	- to draw cross-section
▪ Values:	- to appreciate the natural beauty of rivers.
	- to respect and treasure the intimate relationship between rivers, ecosystem and settlement
	- to recognise the importance of water quality to water resources of Mainland China and H.K.

4. **From Channel to Stream: Kai Tak River (啟德河的蛻變—從渠道到清溪)**

Relevance to the DSE curriculum	- C2: Managing River and Coastal Environments
▪ Knowledge:	- to understand the usage of the urban stream
	- to understand the management strategies of urban stream
	- to analyze the relationship between river and surrounding land uses
	- to analyze the effectiveness of river revitalization
▪ Skills:	- to master the skills in measuring the width and depth of urban channel
	- to classify and record the land use and land use distribution
	- to observe the river management strategies and understand their relationship with the surrounding environment
	- to conduct questionnaire survey
▪ Values:	- to appreciate the urban stream after revitalization
	- to recognise the importance of good water quality to Mainland China and Hong Kong

5a. **Changing Industrial Location—Wong Chuk Hang / Kwai Chung (轉變中的工業區位—黃竹坑 / 葵涌)**

Relevance to the DSE curriculum	- C3: Changing Industrial Location
▪ Knowledge:	- to understand the present situation of manufacturing and non-manufacturing activities in the study area
	- to analyze the change of manufacturing activities and the locational factors in the study area
▪ Skills:	- to use appropriate sampling methods to improve the representativeness and reliability of data collected
	- to use various fieldwork strategies to collect primary data e.g. land

	use mapping, categorizing and counting, observation and recording
	- to use appropriate statistical graphs to process quantitative data
▪ Values:	- to cherish the advantage of industrial development between Mainland China and Hong Kong

5b. **Transformation of San Po Kong Industrial Area (新蒲崗工業區的蛻變)**

Relevance to the DSE curriculum	- C3: Changing Industrial Location
▪ Knowledge:	- to understand the type and use of buildings in the current San Po Kong Industrial Area - to combine secondary data and analyse the factors favourable to industrial development in San Po Kong in the past and the reasons for the changes
▪ Skills:	- to collect primary data using methods such as observation, scoring and counting - to conduct spatial data analysis using a geographic information system - to present the data using appropriate diagrams
▪ Values:	- to cherish the industrial development advantages that are mutually beneficial to Mainland China and Hong Kong

6. **Urban Problems in Cheung Chau (從長洲看城市問題)**

Relevance to the DSE curriculum	- C4: Building a Sustainable City
▪ Knowledge:	- to investigate the relationship between urban problems and distance of town center of study area
▪ Skills:	- to assess the level of urban decay - to use choropleth maps, scatter diagrams and correlation coefficient - to compare different sampling methods
▪ Values:	- to develop students' awareness of urban problems and sustainable development

7. **Reshaping Wan Chai: Exploring the Path of Urban Renewal (灣仔再生：探索市區更新之路)**

Relevance to the DSE curriculum	- C4: Building a Sustainable City
▪ Knowledge:	- to study the relationship between urban renewal and the urban environment

	- to understand the various approaches to urban renewal - to evaluate the environmental improvements brought about by urban renewal
▪ Skills:	- to apply various data collection methods and using field equipment for measurement to local environmental data - to assess the urban environment using different data collection methods - to create charts to demonstrate whether urban renewal can achieve sustainable urban development
▪ Values:	- to develop sensitivity to the development of the surrounding environment - to show concern for issues arising from urban development - to cultivate a sense of responsibility for protecting and improving the urban environment

8. **Farming System in Mui Wo (從梅窩看農業系統)**

Relevance to the DSE curriculum	- C5: Combating Famine
▪ Knowledge:	- to understand farming system (conventional farming and controlled environment agriculture) - to examine how urban development affects farming activities - to assess the feasibility of sustainable farming development through application of modern farming technology
▪ Skills:	- to classify land use in various farming areas - to conduct laboratory works of water samples - to analyse secondary data
▪ Values:	- to develop students' awareness of the development of sustainable farming - to understand the impact of farming activities on the ecological environment and our responsibilities - to recognise the importance of sustainable farming development to the national food supply security

9. **Exploring Woodland in Cheung Chau (長洲林地探索)**

Relevance to the DSE curriculum	- C6: Disappearing Green Canopy
▪ Knowledge:	- to understand the characteristics of abiotic and biotic components of a woodland ecosystem - to understand the structure of woodland and the characteristics of

		woody plants in woodland
▪ Skills:	-	to collect data of vegetation and soil
	-	to compare and analyze primary data
▪ Values:	-	to cherish the interdependence of human and natural environment
	-	to nurture students' concern for the tropical rainforest and awareness of the importance of protection of tropical rainforest on safeguarding national ecological security

10. Urban Microclimatic Studies in Central (中環城市微氣候研究)

Relevance to the DSE curriculum	-	C7: Climate Change
- Knowledge:	-	to investigate the relationship between the urban microclimate and urban environment
	-	to study the physical and human factors leading to Urban Heat Island effect
	-	to assess the mitigation and adaptive measures tackling Urban Heat Island effect
- Skills:	-	to use different field equipment to collect microclimatic data
	-	to use different data collection methods to assess the urban environment
	-	to draw graphs to show the relationship between microclimate, urban environment and distance from the city centre
- Values:	-	to raise public awareness of Urban Heat Island effect
	-	to understand the impacts of urban development on the ecological environment and our responsibilities
	-	to recognise the challenges to national security imposed by global climate change due to urban development

11. Studies of Island Weather (小島天氣研究)

Relevance to the DSE curriculum	-	C7: Climate Change
	-	E2: Weather and Climate
- Knowledge:	-	to understand different weather elements
	-	to examine the impact of natural factors and human activities on weather
	-	to understand the effect of urban planning on urban microclimate
- Skills:	-	to use different field equipment to collect data of weather elements and the surrounding environment
	-	to draw graphs to show the data of different weather elements and the distribution of urban climate sensitivity

- Values:	- to understand the impacts of changing weather elements and our responsibilities
	- to recognise the challenges to national security imposed by global climate change due to urban development

12. **Physical Environment of Cheung Chau (長洲的自然環境)**

Relevance to the DSE curriculum	- C2: Managing River and Coastal Environments
	- E1: Dynamic Earth
- Knowledge:	- to observe the geology of Cheung Chau
	- to understand the physical landscapes along Little Great Wall to Nam Tum in Cheung Chau in relation to internal and external processes (weathering, erosion and mass wasting)
- Skills:	- to practise geological fieldwork techniques
	- to measure the weather conditions by field equipment
- Values:	- to appreciate and cherish the invaluable geological resources

13. **Traffic and Pedestrian Flow Studies (交通及人流研究)**

Relevance to the DSE curriculum	- E3: Transport Development, Planning and Management
- Knowledge:	- to study the traffic and pedestrian flow
	- to analyze the interrelationship between the traffic and pedestrian flow and surrounding environment
- Skills:	- to use field observation, measurement and counting to collect field data
	- to apply sampling method to improve the validity and reliability of data collected
- Values:	- to understand the relationship between the transportation system and social development
