Choice of Topics

Teachers can choose **EITHER** option:

- ♦ Option 1: **1 + 1** (Two 1-day topics)
- ♦ Option 2: **2** (One 2-day topic)

Topic Description

OP. Opportunities and Risks of Natural Hazards (自然災害的機會與風險) <1-Day>

Relevance to the DSE curriculum	-	C1: Opportunities and Risks
▪ Knowledge:	-	to recognize major natural hazards in Hong Kong - to understand the reasons behind people's different responses to natural hazards
▪ Skills:	-	to use data collection methods such as questionnaire, interview and scoring - to draw choropleth maps and scatter diagrams - to summarize the interviews
▪ Values:	-	to understand the role of human in complex man-land relationship through the topic of natural hazards

CE. Exploring the Coast in Cheung Chau (長洲海岸探索) <1-Day>

Relevance to the DSE curriculum	-	C2: Managing River and Coastal Environments
▪ Knowledge:	-	to identify the characteristics of coast and the coastal landform features - to examine the factors and processes in shaping the coast
▪ Skills:	-	to exercise the sampling methods - to apply various data collection methods e.g. drawing field sketches and using field equipment for measurement - to draw beach profile for processing and presenting the morphological data
▪ Values:	-	to appreciate the beauty of the nature - to recognise the importance of managing marine resources sustainably and maintaining the safety of marine resources

DC. Drifting Classroom (漂流教室) <1-Day>

Relevance to the DSE curriculum	-	C2: Managing River and Coastal Environments
---------------------------------	---	---

▪ Knowledge:	- to identify the characteristics of river courses and the associated landform features
	- to relate the exogenetic fluvial processes with the characteristics of river channel and the associated landform features
	- to analyze how human factors (river management measures and land use) affect the characteristics of river channel
▪ Skills:	- to use different equipment to collect data of channel characteristics
	- to draw cross-section
▪ Values:	- to appreciate the beauty of rivers
	- to respect and treasure the intimate relationship between rivers, ecosystem and settlement
	- to recognise the importance of water quality to water resources of China and H.K.

UP. Urban Problems in Cheung Chau (從長洲看城市問題) <1-Day / 2-Day>

Relevance to the DSE curriculum	- C4: Building a Sustainable City
▪ Knowledge:	- to investigate the relationship between urban problems and distance of town center of study area
	- to solve urban problems from a sustainable development perspective (for 2-Day version)
▪ Skills:	- to assess the level of urban decay
	- to use choropleth maps, scatter diagrams and correlation coefficient
	- to compare different sampling methods
	- to use Geographic Information System (GIS) for data processing (for 2-Day version)
▪ Values:	- to develop students' awareness of urban problems and sustainable development

AG. Farming System in Mui Wo (從梅窩看農業系統) <1-Day / 2-Day@>

Relevance to the DSE curriculum	- C5: Combating Famine
▪ Knowledge:	- to understand farming system (conventional farming and controlled environment agriculture)
	- to examine how urban development affects farming activities
	- to assess the feasibility of sustainable farming development

	through application of modern farming technology
	- to understand the farming constraints faced by farmers (for 2-Day version)
▪ Skills:	- to classify land use in various farming areas - to conduct laboratory works of water samples - to conduct laboratory works of soil samples (for 2-Day version) - to collect qualitative data using in-depth interview (for 2-Day version) - to analyze secondary data
▪ Values:	- to develop students' awareness of the development of sustainable farming - to understand the impact of farming activities on the ecological environment and our responsibilities - to recognise the importance of sustainable farming development to the national food supply security

@ fee will be applied for 2-Day version on visiting the organic farm

WL. Exploring Woodland in Cheung Chau (長洲林地探索) <1-Day / 2-Day>

Relevance to the DSE curriculum	- C6: Disappearing Green Canopy
▪ Knowledge:	- to understand the characteristics of abiotic and biotic components of a woodland ecosystem - to understand the structure of woodland and the characteristics of woody plants in woodland - to understand human interference on woodland environment (for 2-Day version)
▪ Skills:	- to collect data of vegetation and soil - to compare and analyze primary data - to collect data of micro climate (for 2-Day version)
▪ Values:	- to cherish the interdependence of human and natural environment - to nurture students' concern for the tropical rainforest and awareness of the importance of protection of tropical rainforest on safeguarding national ecological security

UC. Urban Microclimatic Studies in Central (中環城市微氣候研究) <1-Day>

Relevance to the DSE curriculum	- C7: Climate Change
---------------------------------	----------------------

▪ Knowledge:	- to investigate the relationship between the urban microclimate and urban environment
	- to study the physical and human factors leading to Urban Heat Island effect
	- to assess the mitigation and adaptive measures tackling Urban Heat Island effect
▪ Skills:	- to use different field equipment to collect microclimatic data
	- to use different data collection methods to assess the urban environment
	- to draw graphs to show the relationship between microclimate, urban environment and distance from the city centre
▪ Values:	- to raise public awareness of Urban Heat Island effect
	- to understand the impacts of urban development on the ecological environment and our responsibilities
	- to recognise the challenges to national security imposed by global climate change due to urban development

IS. **Studies of Island Weather (小島天氣研究) <1-Day>**

Relevance to the DSE curriculum	- C7: Climate Change
	- E2: Weather and Climate
▪ Knowledge:	- to understand different weather elements
	- to examine the impact of natural factors and human activities on weather
	- to understand the effect of urban planning on urban microclimate
▪ Skills:	- to use different field equipment to collect data of weather elements and the surrounding environment
	- to draw graphs to show the data of different weather elements and the distribution of urban climate sensitivity
▪ Values:	- to understand the impacts of changing weather elements and our responsibilities
	- to recognise the challenges to national security imposed by global climate change due to urban development

PE. **Physical Environment of Cheung Chau (長洲的自然環境) <1-Day>**

Relevance to the DSE curriculum	- C2: Managing River and Coastal Environments
	- E1: Dynamic Earth
▪ Knowledge:	- to observe the geology of Cheung Chau
	- to understand the physical landscapes along Little Great Wall

		to Nam Tum in Cheung Chau in relation to internal and external processes (weathering, erosion and mass wasting)
▪ Skills:	-	to practise geological fieldwork techniques
	-	to measure the weather conditions by field equipment
▪ Values:	-	to appreciate and cherish the invaluable geological resources

TR. Traffic and Pedestrian Flow Studies (交通及人流研究) <1-Day>

Relevance to the DSE curriculum	-	E3: Transport Development, Planning and Management
▪ Knowledge:	-	to study the traffic and pedestrian flow
	-	to analyze the interrelationship between the traffic and pedestrian flow and surrounding environment
▪ Skills:	-	to use field observation, measurement and counting to collect field data
	-	to apply sampling method to improve the validity and reliability of data collected
▪ Values:	-	to understand the relationship between the transportation system and social development

DE. Dynamic Earth: From Theory to Practice of Geoconservation (動態的地球: 從理論到實踐的地貌岩石與保育) <2-Day>

Relevance to the DSE curriculum	-	E1: Dynamic Earth
▪ Knowledge:	-	to examine the underlying factors and processes in shaping the geology and geomorphology of the study area
	-	to investigate the possibility of development of geotourism in the study area
▪ Skills:	-	to practise skills of geology fieldwork
	-	to inspire different angles of critical thinking
▪ Values:	-	to cherish the invaluable geology resources in Hong Kong
